Georgetown University, USA

*Session 5B: Immunology of Intestinal Transplantation: A: Innate and Cellular Immune Responses in Intestinal Transplantation – New Discoveries; July 2, 2023; 11:00am-11:20am*

---

Alexander H. K. Kroemer, MD, PhD is a transplant and hepatobiliary surgeon at the MedStar Georgetown Transplant Institute and the Scientific Director of the Center for Translational Transplant Medicine at Georgetown University Medical Center. In this dually appointed role, Dr. Kroemer splits his time between performing transplants of abdominal organs including livers and intestines in both adult and pediatric patients, and conducting basic and translational research on innate and adaptive immune responses in transplantation and oncology. He is an NIH-funded investigator and active member of the American Society of Transplant Surgeons and American Society of Transplantation, where he serves on their respective grants committees. He is also an Associate Editor of the American Journal of Transplantation.
