Columbia University, USA

*Session 3B: Immunology and Immunosuppression: C: Update on Maintenance Immunosuppression Post Bowel Transplant; July 1, 2023; 3:10pm-3:30pm*

*Session 3B: Immunology and Immunosuppression: E: Abstract Presentations: The First Collective Examination of Immunosuppressive Practices Among American Intestine Transplant Centers; July 1, 2023; 3:40pm-4:30pm*

*Session 8B: Towards Tolerance in Intestinal Transplantation: D: Updates on Tolerance in a Porcine Model of Intestinal Transplantation; July 3, 2023; 11:20am-11:30am*

---

Joshua Weiner is a transplant surgeon at Columbia University Irving Medical Center, where he serves as Assistant Professor of Surgery, Surgical Director of the Intestinal Rehabilitation and Transplantation Program, Associate Program Director of the Abdominal Organ Transplant Surgery Fellowship, and a Principal Investigator at the Columbia Center for Translational Immunology. He trained in general surgery at Columbia before performing his abdominal organ transplantation and hepatopancreaticobiliary surgery fellowship at Georgetown. He has almost 20 years of research experience in the field of transplant immunology. Dr. Weiner's clinical practice includes kidney, pancreas, intestinal, and multivisceral transplantation, and his current research interests include the investigation of multilineage chimerism after intestinal transplantation and the association between the intestinal microbiome and rejection. He is also the principal investigator for combined solid organ and bone marrow transplantation clinical trials.
